

## COLOP e-mark ® Ribbon Station – Product data sheet and description

### Short description

With the COLOP e-mark ribbon station, ribbons can be printed quickly and easily metre by metre. This makes it perfect for the personalised printing of ribbons and labels in small and very small batches. No matter whether you want to print a whole roll of ribbon or just a certain number of labels, the ribbon station in combination with the e-mark/e-mark create meets every requirement in terms of customisation, flexibility and efficiency in a unique and innovative way.

### Usage

The Ribbon Station is used to print on ribbons, labels or narrow long objects in 3 sizes. To do this, assemble the Ribbon Station according to the instructions included in the packaging. Now place the ribbon roll on the roll holder and fix it. The ribbon is first threaded through the wooden bars and then through the ribbon guide that matches the size of the ribbon. The e-mark is placed in the ribbon guide and printing is done by pulling on the ribbon.

Note: When using the Ribbon Station, you must use templates in the e-mark app that are specifically for it, due to its own settings and print modes. There is a 'Ribbon Station' template category for this in the app. Other templates will not print correctly or these special templates will not print correctly on a normal background. The print length or a number of prints can be selected in the print properties. Step-by-step instructions can be found in the help centre ([instructions for the Ribbon Station](#)).

*Any handling other than that described in this document does not comply with the purpose of this product.*

*The product is not a children's toy.*

### Product features

- Made in Austria out of beech
- Space saving and robust design
- Packaging contains ribbon guides in 3 sizes (item no. 154886 and 155886)
- Compatible with COLOP e-mark and e-mark create
