

## COLOP e-mark® Plastic signs – Product data sheet and description

### Short description

The plastic signs can be easily printed with one of the COLOP e-mark devices. Whether as a name tag for events such as trade fairs and congresses, as labelling for shelves or similar storage systems, for flexible pricing or as gift tags, the signs are very versatile.

With a height of 18 mm, the tags can be easily inserted into the recess of the e-mark ruler and printed in exactly the right position.

The special coating of the cards makes the prints more resistant to water, light solvents and mechanical environmental influences.

### Usage

The plastic signs can be printed quickly and easily using one of the COLOP e-mark devices. We recommend using the respective e-mark ruler for this purpose. The signs can be easily inserted into the recess of the ruler and printed in exactly the right position. The imprint can be customised in advance in the app to match the size of the sign.

*Any handling other than that described in this document does not comply with the purpose of this product.*

*The product is not a children's toy.*
