

## COLOP e-mark® Multiline Printing Tool and Cards – Product data sheet and description

### Short description

The Multiline Printing Tool (MPT) makes it easy to print full-colour cards. The cards can be used in a variety of ways: price cards for the counter, personalised business cards, employee, visitor or membership ID cards, or annual tickets.

In addition to the MPT, the starter set includes 10 paper and 10 plastic cards that are optimally suited for printing with the COLOP e-mark.

These cards are available in the following quantities:

- Pack of 100 paper cards
- Pack of 50 plastic cards

The MPT is compatible with the COLOP e-mark and e-mark create.

### Usage

The Multiline Printing Tool (MPT) is used to easily print cards in the size of 85.5 x 54 mm. The e-mark app comes with its own templates for using the MPT, which must be used due to special settings for the card format. The design can be created as desired. To print the card, the first step is to slide the metal rail down. Now insert the card and push the metal rail back up. The guide rail can now be inserted and the e-mark (without docking station) placed on it. For the printing process, the e-mark and rail are moved in the following pattern: first to the right to print the first line, then slightly down, now to the left for the second line, again down and to the right for the last line.

Further details and step-by-step instructions can be found in the Help Centre ([Instructions for the Multiline Printing Tool](#)).

*Any handling other than that described in this document does not comply with the purpose of this product.*

*The product is not a children's toy.*

### Product features
